

Bog Baby

What is a home learning project?

A home learning project is an activity for you and your child to carry out at home together. We would like you to support your child and develop their ideas over the next few weeks to produce the best project that they can. Please make sure your child's home learning project is in school by **Monday 14th October**, so that we can share them with the rest of the class and give the children lots of time to talk about their creations. **Please make sure your projects are not too large so that we can easily display them in the classroom.**

Your home learning project is to create a friend for the **Bog Baby**.

Do you need to write some instructions on how to care for your creature?

What will I need to do?

Design and make a friend for Bog Baby.

What will it look like?

This could be a fabric creature that you staple, glue or sew together.

It could be a labelled drawing with a sentence about how to look after the creature.

It could be made from recycled materials in your home.

You could make a PowerPoint presentation about Bog Baby's new friend or write a story about them.

You might make a creature from Lego or another construction kit that you have at home.

You could use a potato to make a new friend.

Your imagination can go wild!

Where will your creature live?

What will your creature eat?

How will your creature move in their environment?

Will they have legs, fins or wings?

If you need any help with your home learning project, please email or talk to your class teacher.
